

Description

Crest PAC-42A is a non-silicated alkaline cleaner used for heavy duty cleaning of aluminum, and most other reactive metals. Crest PAC-42A is used at low concentrations and low temperatures (90° to 150°F) to readily remove identification ink, machine oils, metal chips, drawing compounds, soluble oils, talc, rust preventatives and shop soils from the base metal.

- » The product has the appearance of a white granular powder.
- » Is soluble in cold water.
- » Non-corrosive to aluminum, steel, copper alloys, magnesium, cadmium, and nickel when used as directed.
- » Crest PAC-42A has extremely high sequestering properties which provide effective conditioning of the hardest water.
- » Effective cleaning at low temperature.

Specifications

This product meets or exceeds all qualifications for the following:

- » Federal Specification TT-C-490F Method III Class A, B, & C

Method of Use

Application Methods

- » Immersion
- » Spray

Mixing Instructions

1. Fill the tank with $\frac{2}{3}$ of the desired amount of water.
2. Add the PAC-42A.
 - » **Spray Washer:** Add 1 to 2 oz. of PAC-42A per gallon of water to the tank.
 - » **Dip Tank:** Add 6 oz. of PAC-42A per gallon of water to the tank.
Normal operating conditions are 4 to 8 oz. per gallon of water.
3. Mix well.
4. Add remaining amount of water and heat to operating temperature (70° to 190°F). Keep at operating temperature during the cleaning operation.

Equipment

- » **Tanks:** Use mild Steel.
- » **Skimming:** Provide tank with an overflowing pipe or grease dam to permit skimming of accumulated oil, grease, and floating solid particles from the bath.
- » **Agitation:** It is desirable to remove loosened soils. Air agitation or even simple withdrawal and re-immersion of part is helpful.

Caution

Avoid contact with skin, eyes and clothing. Protective clothing such as face shields, rubber gloves, aprons and boots should be worn when handling this material. Refer to product labels and Safety Data Sheets for precautionary and handling information.
